### 【Recent Asahidake Onsen Areas】

11/16 Mt.Asahidake

11/16 Near the Asahidake Onsen

### 【 Late snowfall and above normal temperatures in Asahidake Onsen 】

10/4 First Snow

11/8 Sugatami Station

In Asahidake and Asahidake Onsen town, the coloring of autumn leaves was delayed by 10 days to 2 weeks due to high temperatures and heavy rainfall. The first snowfall (10/4) was 9 days later than normal, and the snow plows were in operation at Asahidake Onsen after the snowfall on 10/17, but there was no significant snowfall after that, and the temperature remained high and rain continued. However, there is a possibility of sudden snowfall in Asahidake Onsen town due to cold air, so winter tires and warm clothes (down jackets, knit hats, gloves) are essential for visitors. The Japan Meteorological Agency has indicated that “DOKAYUKI” is increasing in Hokkaido this year due to recent global warming. Please be sure to check the latest weather forecast before you go out.

### 【 Cross-country skiing course conditions 】

(11/11, 20cm of snow) There is not enough snow to allow a snow compactor to enter the area, and the road surface and bamboos are visible in some areas. This may change depending on the weather.
